

California OES Weather Threat Briefing

Monday, November 29, 2021
9:00 AM PST

Day 1 (Monday): Fire weather conditions will remain locally elevated across southern California today due to breezy conditions and low humidity. Patchy dense fog will be noted across the Central Valley and northern California valleys through late morning, redeveloping again overnight. Some locally dense fog is also expected near the coast across southern California.

WEATHER KEY POINTS

11/29/21 - 12/05/21

Monday-Sunday

- Periods of elevated fire weather conditions will continue across southern California through late week, especially for areas away from the coast where locally breezy conditions will be seen each day while very dry conditions also persist
 - Some brief periods of critical fire weather conditions could also develop across parts of Los Angeles and Ventura Counties Tuesday and Wednesday
- Patchy overnight and morning dense fog will be noted across the Central Valley and deeper valleys of northern through midweek. Some areas of dense fog could also develop near the coast in southern California Monday night through midday Tuesday.
- For the remainder of the state, no weather impacts are expected through next weekend as dry and mild late fall weather continues. Daytime high temperatures may approach record levels for parts of the state through Thursday.
